

Performance Comparison of the epoch Veterinary Point of Care Blood Analysis System versus the i-STAT System and Accutrend Lactate Meter

Equine blood samples were taken at a leading UK veterinary university teaching hospital and analysed on the epoch® (*Epoch Corp*) and i-STAT® (*Abbott Laboratories*) handheld critical care analysers for the purpose of evaluating epoch performance. Lactate was tested using the Accutrend® (*Roche Diagnostics Corp*) lactate meter.

The epoch was evaluated across a wide range of samples from different clinical cases for all parameters. Correlation statistics for the epoch versus i-STAT and Accutrend are detailed in table 1.
